

Get the Power of a 1000 Ton Ajax Forging Press

At a Fraction of the Cost

FULLY UPGRADED. READY TO SHIP. BUILT TO PERFORM.

Optimized for Maximum Productivity & Longevity.

This is a one-time opportunity—only one rebuilt Ajax 1000 Ton Mechanical Forging Press is available.

Optimized Performance

Get the efficiency of a new machine with upgraded components.

- ✓ Fully rebuilt and ready for immediate integration
- ✓ Upgraded for enhanced productivity and consistent forging results
- ✓ Engineered to meet the demands of today's high-volume forging operations

Cost-Effective Investment

Achieve top-tier performance at a fraction of the cost of new equipment.

- ✓ Delivers the strength and longevity of new equipment without the cost
- ✓ Avoid long lead times and higher costs of brand-new machines
- ✓ Ideal for operations needing fast deployment and lasting performance

Ready for Immediate Use

Currently available—no manufacturing delay. Act now before it's gone.

- ✓ Rebuilt with care by industry experts
- ✓ Limited availability—only one press in inventory
- ✓ Perfect for operations looking to expand capacity or replace aging equipment

General Operating Specifications

Reliable performance designed for efficiency and durability.

1000 Ton Capacity – Designed for heavy-duty forging applications
10" Stroke – Optimized for precision operations
26.5" Shut Height – For versatile tooling setups
80 Strokes Per Minute – Supports high-speed production
31" x 40" Die Seat – Provides stable die mounting
28.5" x 28.5" Ram Face – Delivers balanced force across tooling
